

Proper stacking and shipping of pallets.

- Approximately 35 four-foot lamps will fit into a standard manufacturers' T-12 shipping box. (If you need boxes, contact us and will provide them)
- When full, close and tape the end to prevent lamps from sliding out of the box.
- Stack boxes of lamps on standard wooden shipping pallet five boxes across and no more than six boxes high (Limiting stacking height to six tiers prevents crushing lamps on the bottom tier)
- Place less than full boxes on the top tier to prevent crushing less than full boxes on lower tiers.
- Each tier of filled boxes should be stacked perpendicular to the preceding tier if shrink wrap is not to be used.
- Secure shipping pallet with shrink wrap.
- **IMPORTANT, ALL PALLET'S MUST BE LABELED AS "UNIVERSAL WASTE" AND INFORMATION FILLED IN.**
